Part III DETAILED ACTION

1. Claims 36, 38-40, 42 and 44-45 are pending.
2. The request filed on 2-25-03 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/509,687 is acceptable and a CPA has been established. An action on the CPA follows.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 36, 38-40, 42 and 44-45 are rejected under 35 U.S.C. § 102(b) as being anticipated by Sunthornthepvarakul et al., (U) or Clifton-Bligh et al., (V) .

Sunthornthepvarakul et al., and Clifton-Bligh et al., both teach cells transfected with cDNA encoding a TSH-R and luciferase reporter gene and not more than two cAMP response elements, whereby levels of luciferase vary with induced endogenous cAMP levels. Both papers teach using the same construct as disclosed by Applicant in their specification, as such it is reasonable to conclude the plasmid vectors contained the same number of cAMP response elements.

The prior art teachings anticipate the claimed invention.
